

5 AI ML trends to look out for in 2022

There is a rapid increase in the demand for [Artificial Intelligence and Machine Learning](#) in every field, be it [Security](#) or Automotives. Here are a few trends we think you should look out for!

1) AI Systems for Security

- Quick Detection of new Viruses and Malware
- Quick Anomaly detection
- Advanced Intrusion Prevention Systems

2) AI + DevOps

Higher ROI by Optimizing DevOps
Early Identification of Performance Problems
Proactive Recommendations for Improvement to Developers

3) AI in Automotives

- AI powered personalized Infotainment Systems
- Intelligent Alerts and more Advanced Driver Assistance
- C-V2X (Cellular vehicle-to-everything) Solutions and Intelligent Roadside Units (RSUs)

4) AI and Quantum Computing

- Quantum Algorithms for Decision Problems
- Quantum Searching
- Quantum Game Theory
- Open-Source Frameworks for NISQ Algorithms like – Cirq and OpenFermion.

5) Advance Conversational AI

- RPA (Robotic Process Automation)
- Chatbots to Conversational AI bots
- Low code / No-code Platforms
